## Biffa Transform seek urgent resolution of refused application

Transform, the WEEE compliance scheme operated by Biffa has had its application to operate for 2010, 2011 and 2012 refused by the Environment Agency.

Speaking on behalf of the Company, Environment and External Affairs Director David Savory said "This decision came as a complete surprise to us as we had received no warning that there were any problems or issues with our application, and we do not accept the decision of the Environment Agency or the grounds for refusal. We are now in discussion with the EA with a view to securing a resolution early next week".
